

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

15 Annex “Environmental and/or social characteristics” to the Sub-Fund Vontobel Fund – Energy Revolution

Pre-contractual disclosure annex for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Vontobel Fund – Energy Revolution
Legal entity identifier: 5299008S6UZFDPCGIJ49

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

<div><div></div><div>It will make a minimum of sustainable investments with an environmental objective: __%</div></div>	<div><div></div><div>It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of __% of sustainable investments</div></div>

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and social characteristics and invests in issuers that the Investment Manager considers well-prepared to handle financially material environmental and social challenges. The Sub-Fund focuses on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes “Alternative Energy Materials”, “Alternative Energy Generation” and “Energy Storage”. Issuers will be selected based on the Investment Manager’s ESG framework.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

- Percentage of investments in issuers that focus on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes “Alternative Energy Materials”, “Alternative Energy Generation” and “Energy Storage”
- Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund (excluded products and/or activities are indicated under the investment strategy section)
- Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (set at B)
- Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies. Such controversies may be related to environmental, social or governance issues
- Percentage of securities covered by ESG analysis

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

- ☒ Yes, the Investment Manager considers certain selected principal adverse impacts on sustainability factors in the following areas: controversial weapons, social matters and human rights.

The Investment Manager identifies issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. When no reliable third-party data is available, the Investment Manager may make reasonable estimates or assumptions.

Where the Investment Manager identifies an investment as having a critical and poorly managed impact in one of the considered principal adverse impacts areas, and where no signs of remedial action or improvement have been observed, an action by the Investment Manager must be taken. Action mechanisms may include: exclusion, active ownership, tilting.

Information on how principal adverse impacts on sustainability factors were considered will be made available in the periodic reporting of the Sub-Fund.

- ☐ No

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What investment strategy does this financial product follow?

In order to attain the environmental and social characteristics, the Sub-Fund applies the following ESG framework: thematic focus, exclusion approach, monitoring of severe controversies, screening.

Thematic approach:

- The Investment Manager identifies issuers that focus on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes “Alternative Energy Materials”, “Alternative Energy Generation” and “Energy Storage”.

Exclusion approach:

The Sub-Fund excludes:

- securities of corporate issuers involved in products and activities related to: unconventional / controversial weapons (0%), conventional weapons (10%), coal (thermal coal extraction and power, , 10%), nuclear energy (10%), tobacco (5%). Exceptions may apply for companies involved in coal and nuclear energy related activities, if the company in question has an explicit climate transition strategy (documented by an exception list). The percentage indicated reflect the revenue thresholds applied related to the production of such products and/or activities. For selected products and/or activities, additional limits apply as disclosed on the website.

Monitoring of severe controversies:

- The Sub-Fund promotes the adherence with certain international norms and standards by excluding issuers that are (i) in violation of these norms and standards or (ii) that are involved in severe controversies (such controversies may be related to environmental, social and/or governance issues).

Screening:

- The Sub-Fund invests in securities of corporate issuers that pass the minimum ESG rating (minimum is set at B, on a scale from AAA to CCC, with AAA being the best, and CCC being the worst rating), which is provided by a third-party ESG data provider selected by the Investment Manager (MSCI ESG). This model evaluates sector-specific environmental, social and governance criteria. The criteria refer to companies' actions and performance in relation to environmental protection in production, environmental product design, employee relations, environmental and social supply chain standards and management systems. The ESG model scores companies relative to the other companies in the related industry.

Additionally, the Sub-Fund follows an active ownership approach, which takes into account relevant environmental, social and governance matters. The Investment Manager sees these activities as a way to support the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Sub-Fund is covered by the engagement pool of the Investment Manager's stewardship program, which is mainly based on a collaboration with a stewardship partner. The Investment Manager has limited influence on the stewardship partner's engagement program.

The securities will be analyzed based on the binding elements prior to investment and monitored on a continuous basis. The securities in the portfolio have their sustainability performance periodically revaluated using the above-described sustainability framework. If a security does not comply with the binding criteria described below, the Investment Manager divests from such an issuer within a time period to be determined by the Investment Manager without exceeding in principle three months after such breach was detected, considering prevailing market conditions, and taking due account of the best interests of the shareholders. The Board of Directors or the Management Company of Vontobel Fund may decide to further postpone the rectification of such a breach or decide to carry out the divestment in several instalments over a longer period of time in exceptional cases, provided this is considered to be in the best interests of the shareholders.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**
 - The Investment Manager identifies issuers that focus on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes “Alternative Energy Materials”, “Alternative Energy Generation” and “Energy Storage”.
 - The Sub-Fund excludes securities of corporate issuers that derive a non-negligible part of their revenues from excluded products and/or activities listed above.
 - The Sub-Fund excludes securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies. Such controversies may be related to environmental, social or governance issues.
 - The Sub-Fund invests in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (set at B).
 - The ESG analysis covers at least 90% of the Sub-Fund’s securities. The use of ESG data may be subject to methodological limits.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The application of the binding elements, as described above, leads to the exclusion of at least 20% of the investments considered prior to the application of the investment strategy (i.e. global listed equity markets).

- **What is the policy to assess good governance practices of the investee companies?**

The Investment Manager will assess investee companies’ good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance, by applying a severe controversies monitoring process. The Sub-Fund excludes securities of issuers that are (i) in violation of the norms and standards promoted by the Sub-Fund or (ii) that are involved in severe controversies, including those related to governance matters. Unless, in either case, the Investment Manager has identified a positive outlook (for example through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

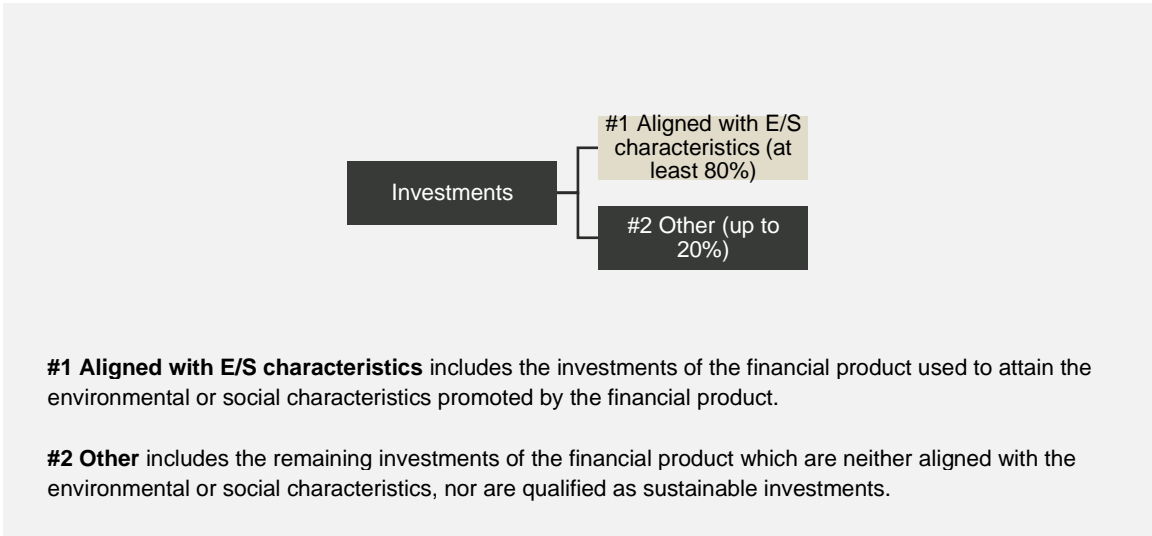

**Good govern-
ance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product?

The Sub-Fund is expected to invest at least 80% of its NAV in issuers that qualify as aligned with E/S characteristics (#1 Aligned with E/S characteristics), under normal market conditions.

**Asset alloca-
tion** de-
scribes the
share of in-
vestments in
specific as-
sets.

The percentage indicated above refer to the Sub-Fund’s net asset value.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Not applicable. Derivatives are not used for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to invest a minimum share in sustainable investments with an environmental objective aligned with the EU Taxonomy as defined by the EU Taxonomy regulation. Therefore, the Sub-Fund's minimum share of investments in environmentally sustainable economic activities in accordance with the EU Taxonomy regulation are indicated to be 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**
- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

● **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund does not partially intend to invest in sustainable investments, as defined by the SFDR. Therefore, the Sub-Fund's minimum share of investments in transitional and enabling activities in accordance with the EU Taxonomy regulation are indicated to be 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable.

What is the minimum share of socially sustainable investments?

Not applicable.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The Sub-Fund may hold ancillary liquidity and use financial derivative instruments for investment and hedging purposes. While these instruments are not expected to detrimentally affect the attainment of the Sub-Fund's environmental and social characteristics, no minimum environmental or social safeguards are applied.

Other investments include also unscreened investments for diversification purposes or investments for which ESG data is lacking. For such instruments the monitoring process of severe controversies is applied.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
